

## PATIENT ENGAGEMENT SOLUTIONS

# TONIC HEALTH

**Engage patients with a fun, fast way to collect accurate and unique data that supports improved care and increases patient satisfaction.**

Tonic is an intuitive data collection platform that makes it easy for patients to enter their information and receive relevant content aimed at inspiring them to take an active role in their care. That data directly integrates with your EHR, leveraging real-time, predictive analytics to promote delivery of safer, patient-centered care.

## WHO IS ELSEVIER?

Elsevier is a leading provider of medical and scientific information, with more than 20,000 products for education, professional science, and healthcare communities worldwide.

Operating across the care continuum, Elsevier Patient Engagement is a set of key solutions that addresses the needs of care providers and patients. We help providers empower clinicians and patients, improve administrative excellence and care, while promoting a culture of quality throughout the enterprise.

**>20 million** scientists, clinicians, information professionals, students and educators worldwide rely on Elsevier clinical information and innovative tools.

## WHAT IS TONIC?

**The more you know about your patients, the more effectively you can treat them - at a lower cost.**

Tonic is an easy-to-use patient information collection platform that promotes more efficient care by speeding up the process of every patient visit, while reducing manual data entry and risk for errors. This advanced tablet- and web-based tool also pushes information to patients and caregivers at the most teachable moments – when they are ready and willing to use it.

Utilizing Tonic, organizations can pull and push vital information in a variety of ways to improve outcomes and service, including:

- Patient Screening
- Intake Assessment
- Risk Assessments
- Patient Video or Text Education
- Patient Satisfaction
- Patient Reported Outcomes
- Quality of Care
- Discharge Management

Also, register patients and secure consents, standardize collection of appropriate data for claims and improve the process of collecting co-pays and adjudicated balances with Tonic's unique functionalities.

**Tonic helps you survey more patients, collect higher-quality patient data and base every clinical decision on more accurate information received from each patient – and all in real time. Customizable for any department, Tonic's data collection capabilities enable organizations to provide personalized care and education.**

## HOW IT WORKS.

Tonic empowers staff to build stronger patient relationships and deliver even better care. The expedited process makes more time for meaningful interactions among patients, staff and clinicians. And it all adds up to excellence driven by accurate data and insights derived from more engaged patients.

### Automated

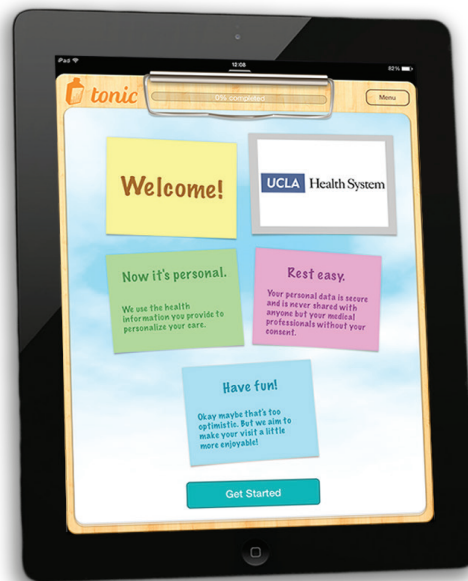

Automate follow-ups in the care planning process, which are documented in the EHR through a HIPAA-compliant interface.

### Fast & Secure

Instantly and securely transfer detailed patient survey data, including risk assessment scores, directly into your EHR and workflow.

### Formatted

Automatically transmit embedded Elsevier patient education materials and alerts.

### Customizable

Create customizable, detailed patient surveys or forms to collect specific information – from medical background details to patient satisfaction scores to patient-reported outcomes and more.

### Chronic Care Management

Satisfy the main components of chronic care management requirements.

### Convenient

Access actionable information where and when you need it.
